Maximum Marks	4 Marks

Empathy Map

Create an empathy map to understand your customer/user from four perspectives - what they Say, Think, Do, and Feel - in relation to the problem your project addresses. This helps the team build a customer-centric solution.

SAYS "I want my credit card approved quickly." "I need to know if I qualify before applying." "I want to understand why I was rejected."	THINKS Will my income and credit score be enough? What if I get rejected and it affects my credit report? I hope the process is fair and transparent.
PERSONA NAME Applicant – Student / Salaried Professional applying for a credit card	
DOES Fills out the credit card application form online. Checks eligibility criteria and required documents. Waits for approval status and follows up if delayed.	FEELS Anxious about the chance of rejection. Hopeful while waiting for a decision. Relieved and satisfied once approved.
