

Demonstration of Proposed Features

Date	3 JULY 2026
Team ID	SWTID-2026-6495
Project Name	Credit Card Approval Prediction
Maximum Marks	1 Mark

Demonstration of Proposed Features:

This document captures all the features that were proposed during the project planning phase and tracks whether each feature was successfully implemented and demonstrated. It serves as evidence of the team's ability to deliver on the proposed solution.

S.No	Feature Name	Description	Status (Implemented / Partial / Pending)	Demonstrated (Yes / No)	Remarks
1	Applicant Data Input	Accepts applicant details such as income, employment, education, and credit history through the Flask web form.	Implemented	Yes	User input working successfully
2	Data Preprocessing	Cleans data, handles missing values, and encodes categorical features before prediction..	Implemented	Yes	Data processed correctly
3	Credit Card Approval Prediction	Uses the trained machine learning model to predict whether the application is approved or rejected.	Implemented	Yes	Accurate prediction displayed
4	Model Evaluation	Compares Logistic Regression, Decision Tree, Random Forest, and XGBoost to select the best model.	Implemented	Yes	Best-performing model selected
5	Flask Web Application	Provides an interactive web interface for entering applicant details and viewing prediction results.	Implemented	Yes	Application working successfully
6	IBM Cloud Deployment	Deploys the trained model using IBM Watson Machine Learning for cloud-based prediction.	Implemented	Yes	Successfully deployed and accessible

Feature Implementation Summary:

Total Features Proposed	6
Total Features Implemented	6
Total Features Demonstrated	6
Overall Implementation Rate (%)	100%
